

ATHARVA TENDLE

811 N Street, #521 | Lincoln, NE 68508 | 402-875-3405 | GitHub: Atharva7 | atharva.tendle@huskers.unl.edu

Education

University of Nebraska-Lincoln

Bachelor of Science

Major: Economics, Computer Science

GPA: 3.88/4.0

Lincoln, Nebraska

May 2019

Programming Skills

Python, C++, Java, Deep Learning, Machine Learning, Android Studio, HTML, CSS, JavaScript, SQL, R, Unix, C, Unix

Work Experience

Raikes Design Studio – Jefferey S. Raikes School of Computer Science and Management

Lincoln, Nebraska

Developer (Associate)

August 2018 – Present

- Worked on Image Generation and Batch Trading processes which helped increase the amount of data by a factor of 8 and allowed for improved training process for the NN model.
- Wrote scripts which utilized libraries like NumPy, Pandas and Requests to scrape image data from Proxibid servers and then curated the data set for the project using the scraped data.
- Will attempt to solve an Hierarchical Image Classification problem for the firm Proxibid via the application of various types of Convolutional Neural Networks.
- Will work in a team of 6 to implement an API using the Flask framework which will integrate our NN model with the Proxibid Tech Stack.

Bureau of Business Research – College of Business, University of Nebraska-Lincoln

Lincoln, Nebraska

Data Science Analyst

February 2018 – Present

- Implement the O*Net API to search and collect data.
- Use libraries like urllib3 and Pandas to collect and store data.
- Implement basic text/language processing algorithms to process data and then using Machine Learning models to map employment data provided by Nebraska Department of Labor to standardized labor codes.
- Write algorithms in Python to analyze the data and compute accuracy of mapping for further statistical and economic analysis.

Fanword

Lincoln, Nebraska

Software Development Intern

May 2018 – August 2018

- Learned and implemented various technologies like HTML, CSS JavaScript and WordPress to build the new Fanword website and customize it to our needs.
- Handled creation and testing of various functionalities and pages of the website all the way to the website launch.

Collaborate, DevTeams - University of Nebraska-Lincoln

Lincoln, Nebraska

Machine Learning Lead

Nov 2018 – May 2019

- I will be leading a group of 6 students in creating the logic behind the platform called Collaborate which is a part of a Student Organization called the DevTeams.
- I aim to create a Recommendation System with my team to provide the core logic for this platform which aims to foster innovation at our University.

Projects

Song Recommendation System, CSCE 478: Intro to Machine Learning

June 2018

- Learned various Machine Learning Principles to create a basic song recommendation system which utilized KNN, Linear Regression and a Multilayer Perceptron Classifier to learn the features of a user's song preferences and the suggested 10 songs which are similar to a user's tastes.

WIMTA ("Where is my TA") App: CornHacks

April 2018

- Created an efficient TA management system (Android App + static web page) as a part of a Hackathon in order to solve a issue at our university.
- Awarded first position at the Hackathon.

Karaoke App, CSCE 361: Software Engineering

Dec 2017

- Built an android application by utilizing Agile methods, for Karaoke starting from the ideation stage all the way to a functioning prototype in a team of four.

Vending Machine, CSCE 230: Computer Organization

Dec 2016

- Programmed an Altera board to function like a basic vending machine. The board could then perform mathematical calculations which a normal vending machine performs along with displaying activity.

Invoice System, CSCE 156: Object Oriented Programming

May 2016

- Utilized OOP principles to create a basic Invoice System which generated invoices, with the help of SQL for data recovery and storage, with a team of two.

Involvement

Clifton's Strengths Institute – College of Business, University of Nebraska-Lincoln

Aug 2018 – Oct 2018

Clifton Certified Student Strengths Coach

- Analyzed and understood the individual Strengths of each student and then helped them to incorporate Strengths based thinking into their daily lives to boost success and productivity.

College of Arts and Sciences, CSCE 235 (Intro to Discrete Structures)

Jan 2017 – Dec 2017

Teaching Assistant

- Assisted and guided students in the course to understand concepts and clear doubts regarding the assignments.

New Student Enrollment Office

Aug 2016 – May 2017

Welcome Team Leader

- Planned and executed various activities for new international students to help them smoothly adjust to college life

Alpha Kappa Psi-Zeta Chapter:

February 2016 – September 2016

- Was a member of the Business Fraternity. Helped with social events around campus and learned skills necessary in the professional world.

Honors

R Parker & M S Eastwood Scholarship, Global Laureate Scholarship
 College of Business Administration Dean's List (Fall 2015, Spring 2016)
 High Scholar, University of Nebraska-Lincoln (April 2016)
 Alpha Lambda Delta, Phi Eta Sigma (Honors Society)

Honors Thesis

Artificial Intelligence, Health Care and the Economy

As a part of my Honors Thesis I am analyzing the impact of automated technologies like Artificial Intelligence on the Health Care industry, especially Cancer Research. Using the findings, I aim to investigate the possible effects that a technology like Artificial Intelligence can create on the Economy. To do this I plan to utilize my two interdisciplinary majors. Using the knowledge that I have learned through my undergraduate degree I wish to answer some important questions related to labor and the growth of the economy.
