Experience

Machine Learning Intern → *Computing Architecture Research Lab – UNL*

May 2019 – Aug 2019

- Implemented script to asynchronously scrape data from Twitter.
- Utilized computer vision techniques to clean and process the image data.
- Implemented data augmentation techniques to increase the training data by a factor of 5 while reducing associated bias.
- Utilized transfer learning to combine the Xception architecture with a deep neural network and then finetuned it to perform regression.
- Created complex convolutional architectures to produce a regression based model.

Data Science Intern → *Bureau of Business Research(UNL) and NDOL*

Feb 2018 – May 2019

- Implemented language processing and cleaning techniques to curate the dataset.
- Created an algorithm to map employment data to standardized labor codes.
- Carried out the project from inception to delivery along with documentation.

Software Developer (Associate) → *Raikes Design Studio – J. S. Raikes School and Proxibid*

Aug 2018 – May 2019

- Worked in a team of 6 to solve a hierarchical image classification problem.
- Wrote scripts which asynchronously scraped data from Proxibid Servers.
- Augmented the data by a factor of 8 and created a custom batch training pipeline.
- Created the deep convolutional architecture used for classification.

Projects

DeepParkour

Jan 2019 – April 2019

- Trained a humanoid agent to transfer a skill from one task to another via Deep Reinforcement Learning.

WIMTA (Where is my Teaching Assistant)

Jan 2018

- Created an efficient TA management system (Android app)
- Awarded 1st position at CornHacks.

Skills

Programming Languages

Python, C++, Java, JavaScript, HTML, CSS

Libraries and Frameworks

Tensorflow, Keras, Pytorch, Numpy, Pandas, Scikit Learn

Tools and Platforms

Git, AWS, Jupyter

Education

University of Nebraska-Lincoln (UNL)

Bachelors of Science 2015 – 2019
Computer Science, Economics 3.91/4.0
High Distinction/Magna Cum Laude

Masters of Science 2019 – 2020
Computer Science
Focus: Artificial Intelligence and Machine Learning

Certification

Udacity

Deep Learning Nanodegree Jun 2019

Coursera

Stanford Machine Learning Jun 2019

Coursework

- Calculus
- Statistics
- Algorithms
- Software Engineering
- Operating Systems
- Machine Learning
- Deep Learning
- Artificial Intelligence
- Econometrics
