EDUCATION

UNIV OF NEBRASKA-LINCOLN

MSC IN COMPUTER SCIENCE: AI/ML
May 2020 | Lincoln, NE
Cum. GPA: 4.0 / 4.0

GRADUATE TEACHING ASSISTANT

- Machine Learning
- Data Analysis and Modelling

UNIV OF NEBRASKA-LINCOLN

BSc IN COMPUTER SCIENCE AND
ECONOMICS
May 2019 | Lincoln, NE
Magna Cum Laude
Cum. GPA: 3.91 / 4.0

PROJECTS

DEEP REINFORCEMENT LEARNING FOR CONTROL THEORY

Investigated Deep-RL and Optimal Control techniques for classical control problems.

DEEP LEARNING NANODEGREE PROJECTS

Implemented several deep neural networks using PyTorch.

DEEP PARKOUR

Attempted to train a humanoid agent to perform parkour on an obstacle course.

CERTIFICATIONS

UDACITY

- *Deep Reinforcement Learning Nanodegree*
- *Deep Learning Nanodegree*

COURSERA

- *Machine Learning - Stanford*
- *Deep Learning Specialization - DeepLearning.ai*

RESEARCH AND EXPERIENCE

HUDL: TEAM APPLIED MACHINE LEARNING | DATA SCIENCE

INTERN

May 2020 – Aug 2020 | Lincoln, NE

- Working on Multi-Object Tracking.
- Improving custom Object Detection framework.
- **Tools:** Python, Pytorch, AWS S3

OPENMINED | RESEARCH ENGINEER

May 2020 - Current | Remote

- Working on various problems concerning, multimodal learning, neural architecture search, meta-Learning through the lens of Data Privacy.
- **Tools:** Python, Pytorch, Tensorflow

PUBLICATIONS RESEARCH

- *Working towards a paper which looks at Neural Architecture Search from a Differentially Private perspective.*

DEEP LEARNING CAMERA TRAP CLASSIFICATION | GRADUATE RESEARCH ASSISTANT

Dec 2019 – Current | Lincoln, NE

- Leading a research project for camera trap image classification.
- Creating an efficient Deep Learning solution to achieve state of the art results on camera-trap images.
- **Tools:** Python, Pytorch, OpenCV

PUBLICATIONS RESEARCH

- *Working towards a paper which attempts to achieve the state of the art results on image-classification for the Snapshot Serengeti Dataset.*

COMPUTATIONAL ARCHITECTURE RESEARCH LAB | MACHINE LEARNING INTERN

May 2019 - Aug 2019 | Lincoln, NE

- Built a Machine Learning pipeline for a computer vision-based research project.
- Utilized Transfer learning and data augmentation to create a classifier for satellite imagery.
- **Tools:** Python, Keras, Jupyter, NumPy, Pandas

PUBLICATIONS RESEARCH

- *David Newton, Dan Piatkowski, Wesley Marshall, Atharva Tendle. Using Deep Learning to Find Correlations Between Urban Design Features and Obesity. (Accepted at EECAD 2020)*

RAIKES DESIGN STUDIO | SOFTWARE DEVELOPER ASSOCIATE

Aug 2018 – May 2019 | Lincoln, NE

- Created a robust hierarchical image classifier which could handle thousands of classes.
- **Tools:** Python, JavaScript, Keras, React, SQL, AWS S3
